

## *Concordia's Cycle of Assessment of Student Learning*

### *Continuous Improvement in Action*

**Outcomes:**

What do we hope students will learn?

**Tools:**

How do we measure that learning?

**Results:**

After we have used our tools, what information have we collected about student learning?

**Conclusions:**

How well are students performing against how we hoped they would perform?

**Changes:**

What should we do differently to increase student learning to the desired level?

**Impact:**

After we have implemented changes recommended in past cycles, have those changes impacted student learning?
